Discussion.

The cited documents represent the general state of the art. The invented steel alloy defined in claims 1-7 and cutting devices defined in claims 8-11 are not disclosed by any of these documents.

The cited prior art does not give any indication that would lead a person skilled in the art to the claimed steel alloy and as a consequence the devices comprising the steel.

Therefore, the claimed invention is not obvious to a person skilled in the art.

Accordingly, the invention defined in claims 1-11 is novel and is considered to involve an inventive step. The invention is industrially applicable.
